

Jenn August C.H.,C.L.S.C.

International Speaker, Trainer & Author

Introduction:

Why do some businesses owners soar while others fail?
Why do some business owners seem confident and go out and get new clients while others hide in the corner?
80% of what we think, feel and do is controlled by our subconscious mind. Most thoughts and behaviors are patterns that were imprinted into us between the ages of 8-12. These thoughts and behaviors are called the Success Imprint™. The Small Business Administration reports that over 50% of small businesses fail in the first five years. Why? Because as human beings we are programmed for survival not success. Old out dated programming can greatly limit how much business and financial success a business owner can have. When the Success Imprint™ is reset with supportive and positive thoughts and behaviors the business owner can operate from a genuine and powerful place and become a magnet to their ideal clients and to money flowing into to their business.
